## → XPERIENCE 2014

The value of a carefully chosen gift is high! The receiver will remember the gift and the company who gave it. That is the power of the promotional gift. Compared to other media, a promotional product is much more capable of building a relationship between the giver and receiver. Research has revealed that over 70% of a targeted group not only appreciates the promotional product, but also uses it on a regular basis!

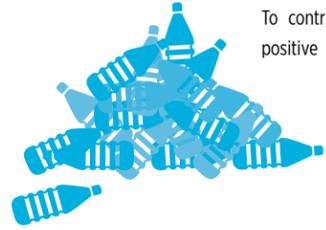

Naturally, the product should comply to all national and European legislation. The collection in this catalogue meets all the quality requirements of the ISO 9001:2008 and ISO 14001:2004 certifications. This is becoming more and more relevant in an industry where sustainability is growing in importance.

This XD Collection takes it a step further. We are convinced we all can make a bigger contribution to our environment and to the resources we use. Our vision and targets are laid down in a long term strategy: XD Vision 2020. If you are interested and like to find out more about it, just have a look at [www.xdvision2020.com](http://www.xdvision2020.com)

The collection in this catalogue also distinguishes itself through a combination of design and functionality. They are products with a high attention value and that have something extra to offer, they help turning targets into results. In short: products that carry out your message the right way.

# THE BATTLE THE BOTTLE

To contribute to the environment in a positive way, who wouldn't want that?

On page 184 - 185 you will find a simple, effective way: **the Battle, the Bottle.**

## BEHIND THE SCENES

Taking it a step further than the printed pictures, that is what this catalogues does. How that works? Some pages show a Layar symbol. These pages can be scanned with the (free) Layar app, after which a short product movie will be shown. More information, more inspiration, more fun!

How to unlock the extra information:

1. Download the Layar app via the Appstore or Playstore on your smartphone or tablet. The app is available for Android and iOS (iPhone/iPad).
2. Look for the phone symbol throughout the catalogue to find out what pages have more information to discover.
3. Open the Layar app and select the scan button then hold your phone 20- 30 cm. from the page.

Enjoy films, how- to guides and interesting interactive content that appear on your screen.

## PRESENTATION SKILLS

We all have been there: giving a fancy presentation, and finding out that we haven't got a proper presenter... XD Design has come up with the solution. The laserpointer App.

On page 50 you will find Point | 03. Point | 03 is a smart combination of a pen and a presenter, controlled through an App on your smartphone.

## BETTER ENVIRONMENT BETTER MATERIALS

Of course, everybody wants to make a contribution to a better environment. And we cannot achieve this all at once, we have to go about it step by step. A large number of products in this catalogue has been produced using new alternative resources. Materials such as RPET, bamboo and reSound™. Just take a look at pages 233 and 245. There you will find some usefull background information alongside some of the finest products.

## ONE FOR ALL

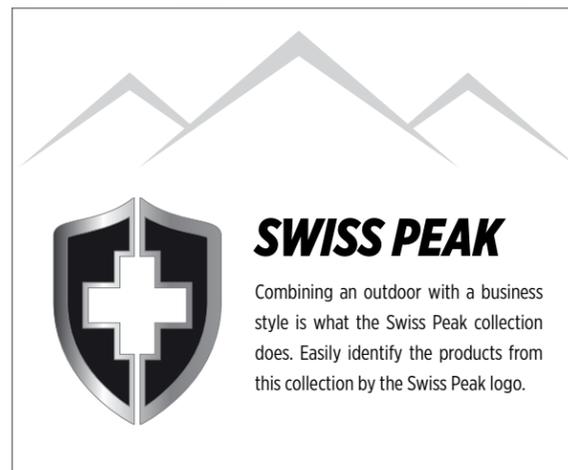

It's not simple to find the right tablet holder. All those different sizes to choose from... so how can you select one when you want to offer a chic tablet holder, but don't know what type of tablet it should hold...? The solution to this can be found on pages 39 to 44. Univo, Axis, Komo and Knight, are all designed in such a way that all tablet sizes fit. One holder for all tablets... Smart!

## DO YOU NEED ENERGY?

Back-up batteries are getting more important. We all know this situation: you need to make one more call or you're right in the middle of your favourite video but your battery has just died! There are so many back-up batteries available on the market that you can't see the wood for the trees. Take a look on page 12 and 13 for an overview of our ultimate selection.

### SWISS PEAK

Combining an outdoor with a business style is what the Swiss Peak collection does. Easily identify the products from this collection by the Swiss Peak logo.

XDDESIGN®

### XD DESIGN

These are products with their very own identity, that are carefully thought through and that above all are fun to give and even more fun to receive! The XD Design products are clearly recognizable in this catalogue by the XD Design logo.

XDDESIGN®

“ Design is one of the most effective ways to differentiate oneself. We don't think it is about adding features. It is about elegant solutions by eliminating unnecessary complexity. ”

## INVEST IN SUSTAINABLE ENERGY

### Power needs today

1.4 billion smart phones are charged every day and this quantity is growing. That equals to 1 smartphone for every 5 people in the world.

5.600.000 mW/h per year is needed to charge all these mobile phones. That is equivalent yearly to power supply a city of 450.000 homes.

### Power needs tomorrow

The numbers are rising rapidly. In 5 years time, 4.5 billion smartphones will be used around the world.

Just imagine how much energy all these phones are going to need, and how big the CO<sub>2</sub> emission will be to produce that energy.

### Working towards a brighter future

There is a much better solution. Solar energy: an environmentally friendly source of power.

By taking inspiration from the Ginkgo leaf we created a product that can charge your mobile phone every day, using only the sun. Not only were we inspired by the ability of the Ginkgo leaf but also by its shape. The shape lends itself to a friendly visual language that makes solar power technology more approachable than intimidating industrial solar panels. By maximizing the solar panels' surface area, the Ginkgo is more efficient in absorbing the sun's power.

Another way we have reduced the carbon footprint of the product is by using sustainable materials. reSound™ material is a combination of bio-based material and PC. For the trunk we used bamboo, which is an easily renewable material. Not only is the function of this product making a positive impact on the environment, but the product itself is as well!

## MAKING THE PRODUCT

### MATERIALS

#### reSound™

Made with bio-derived polymers, designed for durable applications. Unlike neat biopolymers, such as PLA, reSound™ compounds will meet or exceed performance requirements for durable applications previously considered out of reach for bio-based materials. reSound™ offers sustainable solutions and can help customers differentiate their products.

#### Bamboo

Bamboo is botanically classified under the grasses and probably one of the world's most sustainable resources. It is the fastest growing grass that, under ideal conditions, can grow almost one metre per day. Processing bamboo into products is a small change that may form a major contribution to the ecological impact over time.

### DESIGN

The product sketches show where the ideas of the Ginkgo solar tree are born.

# MAKING THE PRODUCT

## TRENDWATCHING

As we know, tablets are taking over the public and work space at a great pace. The rise of tablets ownership will keep on growing steadily. It is estimated that roughly 50% of the European population will have one by 2015. Furthermore the market share between tablet suppliers is shifting rapidly, which gives the consumer a wide range of choices in tablet brands and sizes.

## DESIGN

With the various types of tablets used, we needed to come up with a clean and clever design, compatible and interchangeable with a wide range of tablets. We came up with a (now patented) system, which makes our XD Design tablet holders universal for 7-8" tablets, and for 9-10" tablets.

The product sketches show where the ideas of the patented universal clip system were born.

# REMAKING THE WAY WE MAKE THINGS

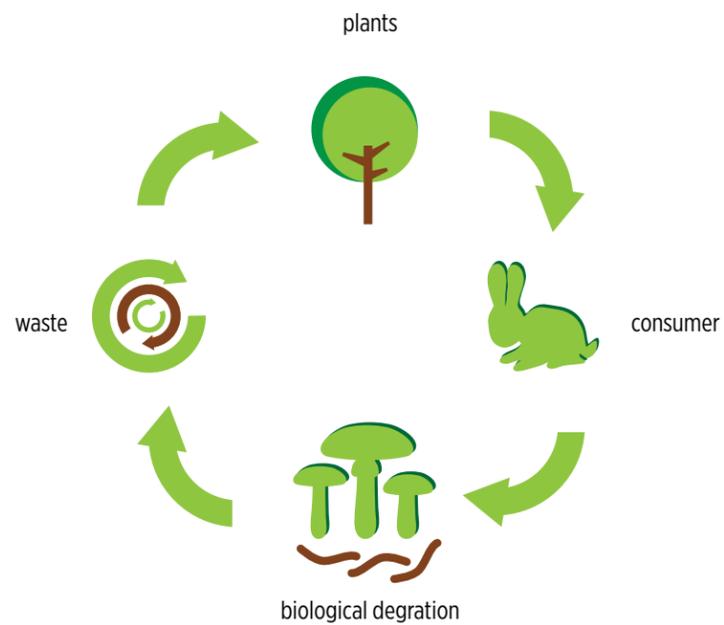

## What does Cradle to Cradle mean?

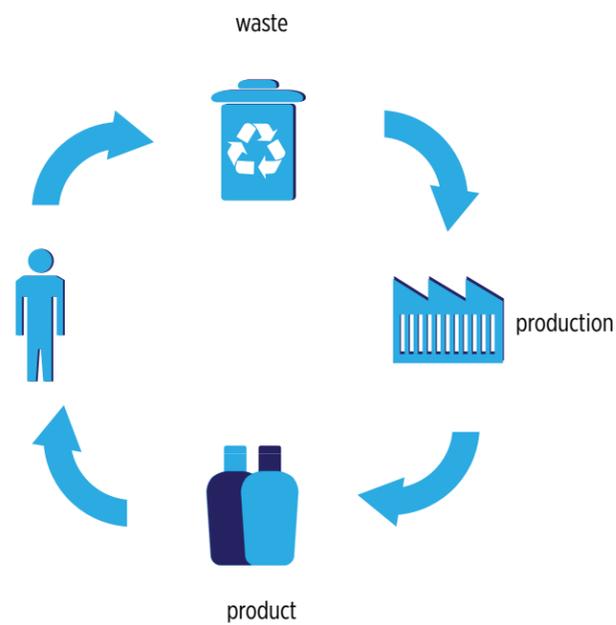

The term Cradle To Cradle is used to describe a sustainability model which is imitative of natural processes, with the goal to create production techniques that are not just efficient but are essentially waste free.

In cradle to cradle production all material inputs and outputs are seen either as technical or biological nutrients. Technical nutrients can be recycled or reused with no loss of quality and biological nutrients composted or consumed. By contrast cradle to grave refers to taking responsibility for the disposal of goods it has produced, but not necessarily putting products' constituent components back into service.

### Biological cycle

### Technical cycle

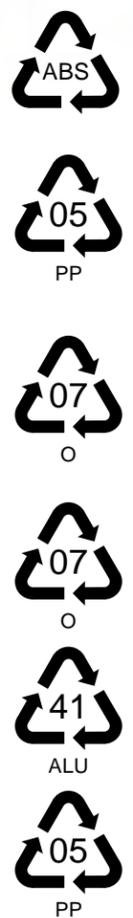

## What does Cradle to Cradle mean for us?

Cradle to Cradle stands for a different, circular way of thinking in which the repeated use of resources is the central idea. This already starts with the design briefing of a new product. One already has to think about how the product can best be recycled at the end of its lifecycle. But we also have to be realistic, our production processes and our consumption behaviour are still very much one-time use orientated. So 'cradle to cradle' thinking and acting are learning processes and like every new initiative they start with small steps! All those small steps will together lead to a substantial contribution to a more environmental friendly world.

# THE BATTLE ~~THE~~ BOTTLE

We use tons of plastic. Massive amounts of it end up in the ocean. It contains toxins, and entangles, it kills sea life, and certainly doesn't biodegrade. But there are ways we can help.

## 54%

of the 120 marine mammal species on the threatened list have been observed entangled in or ingesting plastics.

### HOW MUCH PLASTIC ENDS UP IN THE OCEAN?

Circular currents (gyres) thousands of kilometers wide, collect immense amounts of plastic in all of the world's oceans. Microplastic concentrations in the North Pacific gyre increased 100x in the past 40 years.

### CURRENTS CARRY THE PLASTIC EVERYWHERE

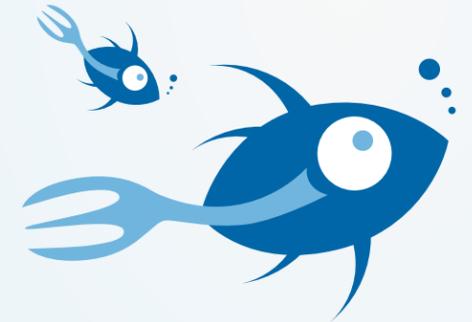

Rubber ducks lost from a shipping container in the **North Pacific** were found near **Scotland**. In the North Atlantic tsunami debris from Japan arrived in **North America**, after crossing the largest ocean on earth **in just 10 months**.

Refill your plastic bottle? **Better not.** Bacteria grow easily on its mouth and the only way to prevent this is by cleaning the bottle with hot soapy water and dry thoroughly between uses. Ever seen anyone doing this?

Our bottles are reusable. Water bottles that lasts a lifetime.

Floating toxic microplastics are often ingested by marine life, which in turn is **consumed by us.**

THE BATTLE ~~THE~~ BOTTLE

It's not just a **bottle**  
It's a **company statement.**

# BBQ FOOD SAFETY TIPS

## WASH YOUR HANDS

Hand-washing is the first defense against cross contamination. Wash your hands before handling any food, and after handling raw meat.

## KEEP IT COOL

Always keep cold foods cold. Pack a cooler bag if you are outdoors. Use a thermometer to make sure you are maintaining a temperature of 5°C.

## FOOD PREPARATION

Use separate cutting boards for raw and cooked foods to minimize cross contamination risk. The easiest way is to use different colour boards.

## USE SEPERATE PLATES AND UTENSILS

After putting raw meat on the grill, switch to clean spatulas, tongs and plates. Using the same utensils and surfaces for uncooked and cooked meats could lead to cross-contamination.

## COOK FOOD TO A SAFE TEMPERATURE

Raw meat and poultry could contain bacteria, so be sure to cook meat to a safe temperature.

A safe internal temperature would be:

steaks	62°C
hamburgers	68°C
chicken	75°C

# FROM BOTTLE TO PRODUCT

## What is rPET?

rPET is recycled PET (Polyethylene terephthalate) from sources such as soda bottles. The material is cleaned thoroughly, ground and reused as raw materials in the production of rPET. The advantage of this material is that it more environmentally friendly.

## rPET has:

- 90% lower carbon footprint than nylon.
- 75% lower carbon footprint than polyester.
- 50% lower carbon footprint than organic cotton

## Here's how we make our products from recycled plastic bottles:

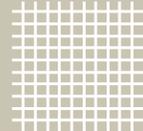

We start with recycled plastic bottles that would otherwise end up in landfills.

The lids and labels are removed and the bottles are smashed and shredded.

After shredding, the material is spun into a woven fiber.

The fiber is now transformed into rolls of cloth.

The products are manufactured from the cloth that started out as plastic bottles.

Some creative thoughts about the applications

The restaurant that has an eye for true personal approach on the menu.

The insurance company that is transparent about the small print.

The retail company that allows customers to see how sharp their prices really are.

The pharmacy that will focus the customer's attention to the information leaflet on the drug.

The bank that wants their customers to think about the big picture and see the smallest details.

The innovative industry that wants to show the full scale of possibilities to investors.

The board of directors that organize a budgetary meeting with shareholders.
